

Creating Groups in D2L

Communications > Groups > New Category

1. Enter a category name
2. Enter a category description
3. Choose an enrollment type:
 - **# of Groups - No Auto Enrollments:** Manually add students to a set number of groups.
 - **Groups of #:** D2L automatically enrolls student to groups, capped at a set number of users per group.
 - **# of Groups:** D2L automatically enrolls students to a set number of groups.
 - **Groups of # - Self Enrollment:** Students enroll themselves into a group, but groups are capped at a set number of users per group.
 - **# of Groups - Self Enrollment:** Students enroll themselves into one of a set number of groups
 - **# of Groups, Capacity of # - Self Enrollment:** Students enroll themselves into one of a set number of groups that are capped at a set number of users per group.
4. Enter the number of groups or number of students per group.
5. Save

Additional Options

Set up discussion areas: This will create a shared discussion area that is accessible for the group members and the instructor.

Set up lockers: This will create a shared file storage space that is accessible for the group members and the instructor. This is beneficial if the group will be collaborating on files.

Set up assignments: This will create a shared assignment for each group, so that one assignment is submitted for each group, but will be graded for each student in that group.
